“Plus Two” New Modes For Extended D-STAR Coverage and Fun!

The new Terminal mode and Access point mode enable you to make D-STAR calls through the Internet, even from areas where no D-STAR repeater is accessible.

Terminal Mode

Connect the ID-51A/E PLUS2 to the Internet through a PC or Android® device, and send your voice and/or data through the Internet gateway to a destination repeater.

Access Point Mode

Use an ID-51A/E PLUS2 radio connected to the Internet through a PC or Android® device, as an Access point. You can use another D-STAR radio to send your voice and/or data through the Access point radio, and communicate with D-STAR stations all over the world.

- PC OS: Windows Vista®, Windows® 7, Windows® 8.1, Windows® 10 ■ Android® OS: Android® 4.0/4.1/4.2/4.3/4.4/5.0/6.0
- A public IP address is required for the Internet connection. (Either a dynamic or static IP address can be used.)
- The Terminal mode and Access point mode require the latest gateway server application to be installed.

D-STAR QSO PARTY 2016

SEPTEMBER 23 (Fri) 00:00 UTC ▶ 25 (Sun) 24:00 UTC
